Factory Profile

A production partner for international apparel brands

ALMER TEXTILE is a Bishkek-based apparel production partner for brands that need private-label garments, sample development, fabric sourcing support, repeatable quality, and export-ready production communication.

Location Bishkek, Kyrgyzstan - a practical Central Asia production base.	Business Model B2B apparel manufacturing for brands, boutiques, institutions, and sourcing teams.
Production Scope Dresses, suits, shirts, trousers, skirts, uniforms, kidswear, menswear, pet apparel, and fabric sourcing.	Buyer Support RFQ review, sampling, MOQ planning, trims, labels, packing, QC, and delivery coordination.

Capabilities

Production categories

ALMER TEXTILE focuses on clean, commercial, repeatable apparel categories suitable for private-label brands and institutional buyers.

European Dresses Mini, midi, maxi, wrap, shirt, linen, tailored, and occasion silhouettes.	Suits & Co-ords Blazers, waistcoats, skirt suits, trouser sets, and capsule wardrobes.
Blouses & Shirts White shirts, satin blouses, cropped shirts, button-downs, and commercial tops.	Trousers & Skirts Wide-leg trousers, tailored pants, pleated skirts, and office-ready separates.
Uniforms & Kidswear School sets, staff uniforms, children's apparel, and repeatable size runs.	Fabric Sourcing Swatches, fabric matching, trims, labels, packaging, and material procurement support.

Workflow

How a production project moves

A clear process helps international buyers compare suppliers and reduce risk before production starts.

1. Inquiry Buyer sends category, references, quantity, size range, fabric direction, destination, and deadline.	2. Review We review tech pack, measurements, construction, trims, labels, packaging, and missing details.
3. Quote Pricing and timing are prepared around product complexity, material route, MOQ, and delivery needs.	4. Sample Fit, fabric behavior, construction, trims, labels, and finishing are checked before bulk.
5. Approval Buyer comments are applied and final details are locked before production.	6. Bulk & QC Cutting, sewing, finishing, measurement control, packing, and delivery coordination.

Typical project windows

- Initial review: 1-3 business days after receiving project details.
- Sample: usually 7-14 business days after confirmed specifications.
- Bulk production: usually 3-6 weeks after sample approval and fabric readiness.
- Final timing depends on product complexity, quantity, materials, approvals, and logistics.

Quality Control

Controlled production for repeat orders

Buyers need more than one good sample. They need approved details to become a stable production run. Quality control starts before bulk production and continues through packing.

- Fabric, trims, labels, and packaging requirements aligned before launch.
- Measurement and size-run control based on approved sample or buyer specs.
- In-line sewing, seam quality, finishing, and appearance checks.
- Final review for measurements, labels, packing, and order documentation.
- Sample comments and approvals kept as a reference for repeat orders.

RFQ Checklist

What to send for a quote

A complete RFQ helps the factory answer faster and more accurately. If some details are missing, ALMER TEXTILE can still review references and guide the next step.

Product Category, reference images, sketch, tech pack, or approved sample notes.	Quantity Estimated quantity, size range, colorways, and repeat-order plans.
Materials Fabric composition, weight, hand feel, swatches, trims, labels, and packaging.	Timing Sample deadline, bulk deadline, delivery country, and logistics preference.
